

# The Internet of Things (IoT)

## Connect and manage billions of devices!

## IoT Hub, Stream Analytics, Logic Apps and Machine Learning

We can connect devices to the cloud and to your on-premise systems and using Power BI dashboards, provide visibility into data collected from your IoT devices.

Using Logic Apps, Azure Functions, API Management and Service Bus, we can design IoT applications that use Azure App Services (e.g. Cognitive Services, Machine Learning, Storage etc.) and that deliver significant ROI. By using the Cloud, we can build solutions that allow you to scale on demand and “pay for what you use”.

### What we do?

Certified in Azure app development

Creative programmers designing scalable IoT solutions

Experts in connecting devices to on premise systems and to the Cloud

Conduct Cloud and IoT Assessments to better understand your needs

Provide Operational Analytics via Application Insights and Power BI

Develop IoT applications that run entirely in the Cloud

Provide cloud management and monitoring services to reduce down time

### Why Enkay?

We are a certified **Microsoft Gold Partner** for Application Integration.

Our developers are well trained in Azure applications development and IoT, and have experience in all aspects of application life cycle management.

As IoT software development specialists, we have a proven record of successfully helping our customers reduce operational costs, improve efficiency and meet uptime SLAs by recommending changes based on best practices.

Our cloud services will allow you to meet your operational SLAs while allowing your end users to focus on your core business

**"Appreciate all your hard work and contribution to the quick resolution of some of our Ops related problems!"**  
- Sr. Manager, Operations, IT at a large Midwest Insurance Compan
