

BizTalk Server 2016 Upgrade

Take advantage of new capabilities released in Feature Pack 2!

Why upgrade to Microsoft BizTalk Server 2016?

There are several **new features** released as part of BizTalk 2016 [Feature Pack 1](#) and [Feature Pack 2](#), but some key features are connectivity to the cloud, allowing you to build hybrid integrations that connect on premise applications to cloud Software as a Service (SaaS) applications, and API Management, allowing organizations to expose BizTalk services as APIs and thereby helping unlock the potential of their data and services.

What we do?

Upgrade earlier versions of code quickly

Development and automated testing

Conduct **Architectural Assessments** to improve performance if necessary

Performance Benchmark testing to ensure SLAs will be met

Provide **Operational Analytics** via Enkay PRO dashboards

Implement **ALM to support** continuous integration

Create **PowerShell scripts** for automated deployments to multiple environments

Why EnkayTech?

We are a certified **Microsoft Gold Partner** for Application Integration and have successfully completed BizTalk 2016 upgrades for our customers.

Our BizTalk team members are well trained and certified as developers on BizTalk Server 2016, and have deep experience in all aspects of application life cycle management.

As integration specialists, we have a proven record of successfully helping our customers reduce operational costs, improve efficiency, and meet uptime SLAs by recommending changes based on best practices that we have curated over multiple successful engagements.

By using BizTalk Server 2016 and Application Insights along with Power BI dashboards, you will be able to meet your operational SLAs while allowing your end users to focus on your core business

"Appreciate all your hard work and contribution to the quick resolution of some of our Ops related problems!"
- Sr. Manager, Operations, IT at a large Midwest Insurance Company
