

Enkay PRO for Microsoft® BizTalk Server

Monitor, detect, alert, analyze, resolve and improve

What is Enkay PRO for Microsoft® BizTalk Server?

- A **monitoring** tool that can be used to
 - detect performance issues, and provide **visibility** into traffic that can help you debug the issue
 - see if you've received any messages from a customer during a certain period of time
 - detect if too many messages are being received from a certain customer
 - see the last time you received anything from a customer
 - monitor health of applications, infrastructure (e.g. hosts, files), SQL DB, CPU, memory etc.
- An **analytics** tool, where we display KPIs that can allow you to analyze
 - out of memory conditions
 - timeouts that cause messages to be suspended
 - performance so you can benchmark throughput and quickly compare impact of changes
 - throttling issues quickly to understand what happened and how to remedy the issue
 - data collected using the graphing capabilities
 - and display of real time and historical data
 - and generate reports that allows you to monitor Production environment on a daily basis
- An **alerting** tool that sends email
 - when retries occur, messages get suspended, or receive or send ports get disabled
 - drives are getting full, spool table keeps growing, or thresholds are exceeded for some reason
- An **operations** tool that can allow
 - Network operators to use this tool without having to provide them with elevated permissions

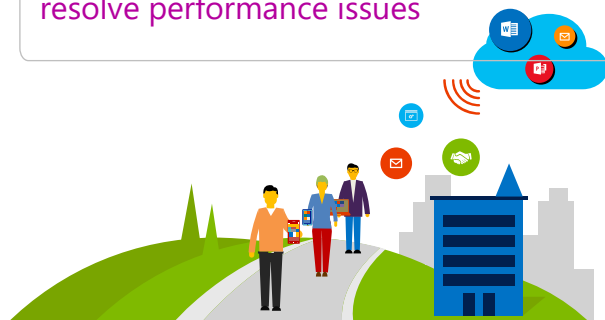

Proactively monitors your systems and alerts you via email if it detects something

Helps you **benchmark the Performance of** your BizTalk environment

Enkay PRO can be extended and customized to meet your requirements

Can **compare performance** based on previous environment configuration

Provide **expert guidance on how to** resolve performance issues

Why Enkay PRO?

Enkay PRO helps our customers reduce down-time due to inadequate monitoring or lack of BizTalk expertise. In addition, some BizTalk issues are difficult to detect and analyse without the right tool. The **Enkay Managed Services (EMS)** team uses PRO to support our customers production BizTalk and EDI environments. We continue to update PRO with new capabilities based on real-world issues that the EMS team have resolved. If you are a BizTalk professional, you will find some of the diagnostics features to be very useful in debugging and resolving issues.

Enkay PRO for BizTalk will allow you to meet or exceed your business goals by allowing you to detect issues before your customers are impacted by them. Contact us for a **free demo** at info@enkaytech.com or toll free at **1-800-400-2406**.

"Very helpful tool!!" - Sr. Manager, App Support, at a large Midwest Insurance Company

3333 Warrenville Road, Suite 115, Lisle IL 60532
